

1100.Find K-Length Substrings With No Repeated Characters

Given a string `S`, return the number of substrings of length `K` with no repeated characters.

Example 1:

Input: `S = "havefunonleetcode", K = 5`

Output: 6

Explanation:

There are 6 substrings they are : 'havef','avefu','vefun','efuno','etcod','tcode'.

Example 2:

Input: `S = "home", K = 5`

Output: 0

Explanation:

Notice K can be larger than the length of S. In this case is not possible to find any substring.

Note:

1. `1 <= S.length <= 10^4`
2. All characters of S are lowercase English letters.
3. `1 <= K <= 10^4`
